PROFESSIONAL SUMMARY

Software Developer and B.E. Computer Engineering graduate (2026) with hands-on experience building REST APIs and full-stack applications across MERN, .NET Core, Django, and Python/AI. Shipped production features improving API performance by 25-30% and eliminating unauthorized access across all protected routes. Built and deployed multiple independent projects spanning backend systems, computer vision, and modern frontend interfaces.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C#, Java, C/C++, SQL

Backend: Node.js, Express.js, ASP.NET Core, Django, REST API, JWT Authentication, RBAC, Microservices, WebSockets

Frontend: React.js, React Router, Next.js, Angular, Tailwind CSS, Bootstrap, Responsive Design

Databases: MongoDB, MySQL, PostgreSQL, SQLite, Query Optimization, Indexing

AI & GenAI Tools: OpenAI API, Claude API, LangChain, Prompt Engineering, GitHub Copilot

Tools & Practices: Git, GitHub Actions, CI/CD, Docker, AWS Lightsail, Azure, Agile/Scrum, Debugging, Unit Testing, Data Structures & Algorithms, OOP

PROFESSIONAL EXPERIENCE

Paarsh Infotech Pvt. Ltd.

Remote, India

Software Engineer Intern | Jan 2026 - Jun 2026

- Architected RESTful backend APIs using the MERN stack for an NGO management platform, supporting concurrent multi-user workflows across 3+ modules.
- Redesigned MongoDB schemas and query pipelines with targeted indexing, improving query performance by 25-30% and cutting average API response time by 20%.
- Implemented JWT-based authentication with role-based access control across all protected routes, reducing unauthorized access incidents to zero.

PROJECTS

NGO Management System - MERN Stack Platform

2026

MongoDB, Express.js, React.js, Node.js, JWT, RBAC, REST API

- Built, reviewed, and refactored RESTful backend APIs for a multi-module NGO management platform used by concurrent multi-user teams.
- Optimized MongoDB schemas and query pipelines with targeted indexing, improving query performance by 25-30% and cutting average API response time by 20%.
- Secured all protected routes with JWT authentication and role-based access control (RBAC), reducing unauthorized access incidents to zero.

DurgSetu AI - AI-Powered Structural Damage Detection

2025

Python, React.js, OpenCV, ResNet-50, Deep Learning, REST API

- Built a computer vision system using ResNet-50 and OpenCV to detect structural damage in buildings, cutting manual inspection time by 40% while achieving 92%+ model accuracy.
- Published REST APIs for an automated image-processing pipeline and delivered a React.js dashboard for inspection report visualization; findings published in a peer-reviewed paper.

StockSync - Product Catalog Dashboard

2026

React.js, React Router, Tailwind CSS v4, Vite

- Built a responsive React.js inventory dashboard with real-time analytics cards, category-distribution visualization, and low-stock alerting.
- Implemented grid/list view toggle, dynamic filters, live search, multi-field sorting, pagination, reactive form validation, dark mode, and local-storage persistence.

Additional Projects: VoicePortrait - AI lip-sync video platform (React.js, Node.js, Python, Wav2Lip, FFmpeg); Whatyouwear - full-stack e-commerce platform (React.js, Django, Razorpay) serving 100+ users at 99%+ uptime.

EDUCATION

SNJB's Late Sau K B Jain College of Engineering

Chandwad, Maharashtra

B.E. in Computer Engineering | CGPA: 8.2/10 | Completed Jun 2026

Relevant Coursework: Data Structures & Algorithms, OOP, Computer Networks, Operating Systems, DBMS, Web Development, Software Engineering.

CERTIFICATIONS & ACHIEVEMENTS

- Node.js (Basic) - HackerRank (May 2026) | Docker Essentials - IBM (Jun 2026) | MongoDB Basics - MongoDB University (Jul 2025)
- AICTE Virtual Internships: AI & ML (Jan 2025), Web Development (Oct 2024) | Published peer-reviewed AI paper
